1. ABERT, J. W. Message...Communicating a Report of an Expedition...on the Upper Arkansas and through the Country of the Camanche Indians, in the Fall of the Year 1845. Washington: S438, 1846. 75 pp., 11 hand-colored lithographs, folding chart, large folding map. 8vo, original full diced brown morocco gilt (expertly rebaked, original spine preserved). A very fine copy, the beautifully colored plates superb. Very rare with colored plates--only Abert's presentation copies had color plates, and the 2 other such copies we trace are incomplete.

First edition. Alliot, p. 17. Bennett, p. 1: "Very fine colored lithographic plates." Graff 6. Howes A10. Plains & Rockies IV:120: "The report begins on August 9, 1845, at Bent's Fort. The party traveled south to the Raton Mountains and thence down the Canadian River, returning through the Creek Nation and arriving at Fort Gibson on October 21." Wheat, Mapping the Transmississippi West 489 & p. 194. "Abert's carefully drawn map provided authoritative information about the north Texas country...His map was important because it was the first trustworthy representation of the Canadian River region...Abert's descriptions of Indians, both pictorially and in the text of his report, provided [for] the first time [to] the federal government...data on the Kiowas and Comanches from one of its own agents. His descriptions of the hostile Comanches and Kiowas, if they discouraged settlement, served a practical purpose...He brought to his western survey a kind of enlightened, almost pragmatic, common sense, in that he noted the regional geography with an eye to everything that would contribute toward the possible solution of the problem of settlement and national development in the particular area" (Goetzmann, Army Exploration, pp. 111 & 126-7). The lithographs are of scenes along the route, including Fort Bent. See illustration. \$17,500.00

2. ABERT, J. W. Original autograph letter signed, dated at Washington City, December 8, 1845, addressed to his brother-in-law, Dr. Robert King Stone. 4 pp., 4to. A few clean tears at folds, otherwise very fine, preserved in a half maroon morocco case.

An outstanding lengthy letter describing his tour of the Comanche country along the Canadian River to survey the Texas border country (see preceding), written about a week after his arrival from the field to Washington. Recounts

his arrival at Fort Gibson on October 22nd, the evening of his wedding anniversary. "I was on my hands & knees feeling for the road in a wild wood almost 4 miles south of the Fort...I had sent my party across by a nearer route, I being obliged to go to the mouth of the Canadian River in order fix its mouth astronomically. Lt. Peck accompanied me as my assistant having been placed under orders by Capt. Fremont, who directed on the 15th of Aug. last to make a complete survey of the Canadian river. This took me through the heart of the 'Comanche' country. I had a party of 37 men & 62 animals i.e. mules & horses with 9 head of cattle for we had no hopes of meeting the Buffalo... Imagine then our trouble traveling over the wildest country where never wagon tire had ere bruised the turf before or crushed rocks uncrushable...In going out to Bents Ft. on the 29th of July we were alarmed by the warwhoop & a discharge of guns...On the next morning Capt. Fremont with 6 men went in search of them leaving me in command of the camp & our hearts were soon made glad by the safe return of all... We never ascertained what Ind[ian]s had shot at us, but suppose them to be the Pawnees. A few days after we met some 'Arrapa-hoes' the chief when at a distance dismounted & gracefully tossing his robe in the air so it should fall spread on the ground made signs seating himself, that we should sit beside him - 'come shair the same blanket - let us eat together & be brothers' I translate the meaning of his gestures." He describes buffalo hunting; camping with the Cheyenne for 2 weeks ("The women dress beautifully - some whiten their leggins with clay & the juncture of the leggins & moccasins is so beautiful neat that it much resembles a stocking of the city ladies"); parting ways with Frémont, who was going on to California; his guide ("Old Fitzpatrick a man of great notoriety in this region & one who led Capt F[rémont] in a former expedition"); and meeting up with "some 'Kio-way's' a bold & desperate set of fellows who have the greatest hostility towards the Texians for killing 40 of this tribe in cold blood, having induced them to enter a Fort under a truce...we might have killed some of these Indians - but it is well not to be the first to shed blood." \$3,500.00

First and only edition. A brutally honest autobiography by a young woman who grew up in West Texas and Abilene at the turn of the century, from her earliest memories through her teaching career and departure for Japan and Europe, where she joined the American expatriates. Apparently publishers in Texas and the U.S. were unwilling to print her book because of its explicit content; consequently this work was published in Paris by Robert McAlmon, who once remarked that the two worst bitches he ever met were both named Gertrude--referring to the present author and Gertrude Stein. It is said that a large portion of this edition was confiscated by U.S.

41. [BOOK CLUB OF TEXAS]. Collection of 6 books issued by the Book Club of Texas. V.p., 1930-37. 12mo & 8vo, original bindings. All very fine, one with signed inscription of Stanley Marcus.

Limited, numbered editions. Lowman, Printing Arts in Texas, p. 23 & 25: "Printing arts in the state [of Texas] received sudden promise of an exciting new direction [when] in 1929 the Book Club of Texas was launched by Stanley Marcus--the Dallas storekeeper whose discriminating taste and forceful personality have strongly influenced cultural development in the Southwest. The goal was to publish things that would `typify the best standards of bookmaking, in regard to subject matter, printing, binding, and typographical design'...Today the Book Club is recalled by many Lone Star collectors with a nostalgia that is usually incurable and always horrendously expensive to treat." The present collection consists of Col. Ellis P. Bean's Memoir, Code Duello, Faulkner's Miss Zilphia Gant, A. W. Terrell's From Texas to Mexico, and The Story of Champs d'Asile (the latter printed at Rydal Press). We are pleased to announce that the Book Club of Texas is in the process of being reestablished. 44. [BORDERLANDS]. Informe de la Comisión Pesquisidora de  
la Frontera del Norte...sobre depredaciones de los indios  
[and] Apéndice...que contiene estados de las incursiones de  
los indios, varios documentos sobre sus depredaciones, y  
muchas otras constancias del mal estado de las relaciones  
entre las fronteras de México y los Estados-Unidos.  
Mexico: Díaz de León y White, 1874. [8] 168; [84]  
(charts), xliii-lxiv pp., 3 large folding maps with outline  
coloring (one measuring 32-1/4 x 28 inches). Small folio,  
full contemporary black calf elaborately embossed. Hinges  
reinforced, tears to maps neatly repaired, text lightly  
browned, but overall a fine copy of a scarce work, signed  
by Galindo, one of the commissioners on the investigation.

Report prepared by a Mexican commission investigating  
recurring Indian depredations, cattle rustling, and the  
general chaotic state of the border. The commissioners  
largely absolved Mexico of blame and placed it on the Texas  
side of the border, claiming among other things that the  
cattle rustling was being done by Texas outlaws disguised  
as Indians. The report carefully documents all recorded  
incidents and has always been considered one of the most  
valuable sources of information on the border during the  
period following the Mexican-American War. The large map  
showing the Rio Grande from its mouth to the Big Bend  
region is the most detailed of the era, locating ranches on  
both sides of the border (see Day, Maps of Texas, p. 87).  
The extra map in this copy is based on Gregg's map of the  
Indian Territory, northern Texas, and New Mexico (see  
Wheat, Mapping the Transmissippi West 482).

This book is bibliographically complex--for a number  
of related works see Adams, Herd 558, 1130 & 2264; Guns  
1108; Howes I33 & T143; Palau 119576-8. Apparently this  
report was extensively enlarged and revised as  
investigations continued; the present copy seems to be the

most complete of the several versions. An English translation was published in 1875, but it does not contain all of the material found in this Mexican edition. First edition. Bennett, American 19th Century Color Plate Books, p. 22n. Field 262. No other white man did so much to interpret and preserve Mandan culture as Catlin, who visited the tribe in North Dakota 5 summers before the smallpox epidemic which destroyed them. Catlin gained acceptance among the Mandans as "medicine white man" because they considered his painting to be a form of magic. In this classic of 19th century ethnology Catlin describes his 1832 observation of the O-Kee-Pa ceremony performed at the Mandan village at the mouth of the Knife River in present North Dakota. It is the first account to be written and illustrated by an eyewitness to the 4-day religious ceremony which incorporated a commemoration of the subsiding of the waters after a great flood, a fertility rite for the supply of buffalo meat, and a

First edition. Cowan, p. 414. Rocq 5117. The Mariposa Estate, or Frémont Grant, was made to Juan B. Alvarado while California was under Mexican rule. The purchaser had the right to locate anywhere in the basin of the Mariposa River, and Frémont chose land already in the possession of miners, who defied the claim. The mines were converted into fortifications, fighting took place, and several men were killed; but in 1859 Frémont prevailed, thus confirming the land grant that brought him great wealth. Wagner, Spanish Southwest 8c (Plate XXXIV). González de Mendoza's book is important for the Spanish Southwest because it contains Antonio de Espejo's account of his 1582-3 expedition to New Mexico and Texas. Espejo crossed the Rio Grande, which he named the Rio del Norte, near Presidio, reached the Pecos River about 30 miles southeast of Santa Fe and followed the river to the present site of Pecos, Texas. The Jumano Indians then guided Espejo through Balmorhea and on up Limpia Canyon by present Fort Davis and Marfa and down Alamito Creek to the Rio Grande. "His discoveries probably did more to stimulate the settlement of New Mexico and the exploitation of its mineral resources than did those of any other of the early explorers" (Handbook of Texas I, p. 572). 146. [HUTCHINS, Thomas]. Manuscript entitled: Five Documents Relating to a Land Claim of Thomas Hutchins to

**Dorothy Sloan Books – Catalogue 5 (5/88)**

Lands near Natchez 1800-1813. 13 folio pages. Slight paper loss on one document, else very good.

Thomas Hutchins was the primary land surveyor for the British in West Florida from 1763 to 1769 and remained active in the area under Spanish rule. In 1771 he was the first to chart the Ohio Valley and in 1784 he published *An Historical Account of Louisiana and West Florida*. He was active in the Old Southwest for the rest of his life. These documents chart the attempts of his son, also Thomas Hutchins, to retrieve 1,000 acres of land granted to Hutchins the elder by Spanish authorities in 1788, a grant evidently contested by the children of his uncle Anthony Hutchins. The archive consists of: memorandum noting the intention of the Spanish to make the grant in 1787; deposition made in 1800 by Andrew López Armento, Secretary of the Governor, giving an account of land titles made to all members of the Hutchins family from 1788 to 1790; deposition by Armento made in 1804 stating that the grant of 1788 was made to Thomas Hutchins and his family alone; deposition signed by James Smith recounting a conversation he had with Thomas Jr. about the grant; document dated Mississippi Territory, 1813, claiming that the heirs of Anthony Hutchins are entitled to the lands since he became a Spanish subject and Thomas did not. A fascinating group of material relating to one of the most famous early explorers and surveyors of Louisiana and Mississippi, illustrating the often tangled nature of Spanish land grants. \$2,500.00

"Beginning about 1836, numerous packet boats steamed up the Trinity River...Congress, in 1852, authorized a survey of the river. rates...Congress...approved a third [survey] in 1899. Beginning in 1902 with an appropriation of \$400,000 the federal government in the next 20 years spent more than \$2,000,000 in building locks and dams on the Trinity" (Handbook of Texas II, p. 803). The project was abandoned during World War II. The present maps are the original maps prepared for the third survey. The index map shows the entire course of the river. The 34 sectional maps, which are keyed to the index map, are on an exceptionally large scale (6-1/2 inches = 1 mile) and give incredibly detailed information, locating towns (includes a city plan of Dallas), bridges, houses, abandoned cabins, farms, cotton fields, plantations, vegetation, creeks, bluffs, landmarks, tree stumps, boulders, ravines, sandbars, shoals, ferry crossings, landings, sloughs, snags, sawmills, water pumping stations, railroad crossings, landslides, islands, etc., as well as the proposed locks. 198. [MARGIL DE JESÚS, ANTONIO]. Original oil painting on canvas of Margil. Mexico, ca. 1726. Measures 31 x 38 inches, in heavy wooden frame. Very good condition.

One of the few surviving colonial paintings that relate to Texas, being a portrait of Father Margil (1657-1726), who established several missions in Texas. "Very few missionaries in the history of the Catholic Church have labored with such indefatigable zeal in winning souls for God as did Fray Antonio Margil de Jesús, one of the pioneers in New Spain. Although during his life his name was held in reverence and benediction by the inhabitants of practically every town from Panama to Louisiana, and although at the time of his death his obsequies were celebrated in many cities both in the Old and in the New World, today, strange to say, only an occasional scholar north of the Rio Grande is acquainted with the missionary activities of this humble but valiant soldier of Christ" (Forrestal, *The Venerable Padre Fray Antonio Margil de Jesús*, p. 5). Margil arrived at Veracruz in 1683 and was

stationed at Colegio de la Santa Cruz de Querétaro. He did early missionary work in Yucatan, Costa Rica, and Guatemala, where he became known as the Apostle of Guatemala. In 1716 he made his first trip to Texas with the Ramón expedition, establishing 3 missions in East Texas. In 1720 he accompanied the Marquis de Aguayo to Texas and established Mission San José at the outskirts of San Antonio de Bexar. See item 101 herein. Details available upon request.

In his very interesting, little-known Texas book, Maris gives a detailed account of his journey from Europe to Galveston via Antigua, Monserrat, Haiti, Cuba, and New Orleans. Most of this work is devoted to Texas, which he refers to as a second El Dorado. He visited Castro's colony, travelled extensively throughout Texas, and describes Houston, San Antonio, New Braunfels, Cibolo, Victoria, etc. He discusses possibilities for river navigation in Texas, devotes an entire chapter to Texas Indians, and enthusiastically chronicles Texas flora and fauna. Includes sociological and economic commentary on Indian and black slavery. \$1,500.00

Corners of last two leaves torn away with loss of a few letters, otherwise a fine copy of a rare and important addition to the literature of the Treaty of Guadalupe Hidalgo.

First edition. It seemed to many Mexicans that the Treaty of Guadalupe Hidalgo gave away a large portion of their country. The Mexican commissioners who signed the Treaty here attempt to justify their actions. They stress that while the U.S. had a stable and prosperous government, Mexico was poor, internally divided, and unprepared for the struggle. There are some interesting observations on Texas, especially regarding the Nueces Strip. The commissioners state that in fleeing to Matamoros after the battle of San Jacinto, the Mexican Army gave the Texans grounds for their claims to the area. \$400.00

The woodcuts, which were recut from the original edition, are the earliest significant collection of New World views and depict Indians, artifacts, flora, and fauna of America. The author was an enlightened observer and learned scholar who served as royal historian to Charles V. He wrote this famous history while in Santo Domingo, after 22 years' residence and research in the Indies. "Oviedo [was] an eyewitness of the events on the Isthmus which led directly to the discovery of Peru. He went out with the governor Pedráis in 1513, and was at Panama with Pizarro and Almagro when they were fitting out their first expedition. He afterwards resided for many years in Hispaniola...He gives a vivid picture of conditions as they then existed, and his work, which possesses considerable literary merit, is a vast storehouse of facts relating to the times. This is the source from which most literary writers have drawn their accounts of the early occurrences in the New World" (Church). \$6,500.00

He describes briefly the physical character of the country and his contacts with Indians and with the Spaniards in Texas. His account is objective and quite impersonal, and he has been commended by students of the region for his accuracy. From Mexico he crossed the Pacific to the Philippines, proceeded to India and the Near East and ended his trip at Marseilles...In 1773-4 he made a voyage toward the South Pole; in 1776 he went on a whaling expedition in the Arctic Ocean off Norway...He fought in the American Revolutionary War and later retired to Santo Domingo [and] was massacred in the slave insurrection...in 1792." U.S.A.] 1920. 144 pp. 8vo, original publisher's binding. Fine.

First American edition of the first book published by the Russian Faction of the Communist Party of the U.S. (a small group of American Communists of Russian origin). This work is a response to Kautskii's polemical work *The Dictatorship of the Proletariat* (published Vienna, 1918), which Lenin took as an almost personal insult. Kautskii's work was banned and the present work was issued and distributed free of charge to all of Russia's libraries and reprinted in every conceivable language beginning in 1920. The present edition was printed in an edition of about 1,000 copies and distributed by Max Maisel; most of the copies were warehoused due to slow sales. In the mid-50's N. Martianoff bought Maisel's stock and sent most of the Marxist publications to a paper mill. The present edition is mentioned in a Soviet publication about Lenin's rarest editions--the author states that 3 copies are known in the U.S.S.R., including the copy in Lenin's personal library in the Kremlin. \$450.00

This important navigational guide to the Sea of Japan and the Sea of Okhotsk gives comparative descriptions of British and Russian published information on numerous islands, bays, capes, etc. The most accurate navigational guide for the area ever published, compiled by prominent cartographer Lt. S. R. de-Livro, who consulted documentation on expeditions by Golovnin, Rickord, Kruzenstern, Sarychev, Kotzebue, Makarov, and many others. \$750.00

First edition. Not in Pekarsii, Pavlenko, Petrov, NUC, or BMC. Unknown biography of prominent Russian statesman, generalissimo, and member of Royal Society. Menshikov, who rose from humble origins (it is rumored that

**Dorothy Sloan Books – Catalogue 5 (5/88)**

in his youth he sold pies on the streets of Moscow), became one of Peter the Great's retainers and was among the 10 close associates who accompanied Peter the Great on his anonymous journey to Holland and England in 1696-7.

Following the death of Francois Lefort in 1699 he became one of Peter's closest personal friends, from which point his career flourished. At the death of the Tsar in 1725, Menshikov played an instrumental role in the accession of Peter's wife Catherine (who had once been Menshikov's servant) to the throne, and was for a time the second most important person in Russia. He schemed to marry his daughter to Peter II, heir to the throne, but became seriously ill for 5 weeks, during which time political alliances changed. Within a short period of time he was deprived of his titles, forced to leave St. Petersburg, and was eventually exiled to Siberia, where he died 7 months later. \$1,250.00

270. [RUSSIA]. PAVLOV, I. P. Lektsii o rabote bol'shikh polusharii golovnogo mazga. Izdanie vtoroe [Lectures on the Function of the Cerebral Hemispheres]. Moscow & Leningrad, 1927. 327 pp. 8vo, original publisher's covers. Very fine, with Pavlov's inscription in old style orthography.

Second edition, revised (the first edition, printed the same year, sold out almost immediately; by May 1927 Pavlov had prepared the present edition, with corrections and an extended bibliography). "Pavlov localized conditioned-reflex activity in the cerebral hemispheres of the brain, demonstrating that the center for such activity is to be found in the cortex" (Dic. Sci. Biog. X, pp. 431-4). According to numerous statements made by Russian emigrés during the last 5 decades, Pavlov was "enfant terrible" among prominent Russian scholars. He openly visited church, criticized Lenin's shortcomings, challenged KGB officers during the interrogations in the mid-1930's, etc., but the Soviet press represented him as a supporter of the Stalin regime. Pavlov's inscription in old orthography (which was outlawed in 1918) indirectly verifies that Pavlov was a nonconformist. For more information on Pavlov and his Nobel prizewinning work, see Garrison-Morton 1022 & 1445 and Printing & the Mind of Man 385. \$1,250.00

First edition. Sechenov, the father of Russian physiology, was one of the first Russians to work with European researchers in Austria and Germany and was the first Russian translator of Darwin's *The Origins of Man*. Sechenov was a favorite of the liberal Russian intelligentsia and his works were immensely popular in their time. For this reason they are seldom found in good condition. The present copy was preserved in a special case for almost 70 years by its previous owner and is in essentially mint condition. See *Dic. Sci. Biog.* XII, pp. 270-71. \$450.00

Fine.

First edition. One of the rarest 20th century books on Russian architecture, covering the construction of the Cathedral-Memorial in honor of the Russian sailors who perished in the Russo-Japanese War, with an account of the history of the construction of the last great cathedral built in Russia before World War I. During the Revolution the warehouse of the printing shop which issued this book was confiscated and all surviving copies of the book were sent to the paper mill--only a few copies of the important monograph survived. \$750.00

Field, p. 344: "This wonderful work, to which the entire life of Father Sahagún was devoted, is beyond question the most important, as it is the most authentic history of events transpiring in the New World, before its discovery by Columbus. All that relates to the religion, customs, government, and wars of the Aztecs, was examined in a manner so critical, so patient and thorough that no history was ever conceived, or brought forth with more labor. 291. SEYMOUR, Samuel (attrib.). Original watercolor painting of an untitled Western scene, signed "S. S. delin." Painted during the Long Expedition, 1819-20. Measures approximately 5 x 8 inches. Fine.

English artist Samuel Seymour "was the first official painter for a Western exploration, the Long expedition to the Rocky Mountains in 1819...Though Seymour was the first artist in the Rockies, his work is not widely known because so few pieces have survived and the ones that have are delicate drawings rather than bold portraits of Indians" (Samuels, Encyclopedia of Artists of the American West, p. 434). Taft, Artists and Illustrators of the Old West, p. 243: "Western illustration [began] with the work of Samuel Seymour;" p. 379: "Seymour...was the first artist...in the Transmississippi West." Trenton & Hassrick, The Rocky Mountains, a Vision for Artists in the 19th Century, p. 22: "Seymour was the first artist to penetrate America's western interior and make sketches on the Upper Missouri and the plains and Rockies, as well as on the Red River of the North." Until the discovery of the present Seymour painting, only 17 of his original works were located (9 of which are at Yale). According to Samuels, none of Seymour's paintings have appeared at auction; the Eberstadts offered 2 Seymour paintings in 1958. Authentication papers and condition report by Patricia Trenton. (numbered 189-202), entitled: *Diario del viaje que se hizo en la Provincia de California*. Mexico, 1766. 2 works in one vol., small folio, contemporary calf, gilt-lettered spine label, edges tinted red. An extremely fine copy, in a much better state of preservation than the other surviving examples (see below), probably from Tamarón's own library, with a rubric on leaf 188, possibly that of the author.

Father Tamarón, a native of Spain, came to America as chaplain to the Bishop of Caracas and in 1758 became Bishop of Durango, a position he maintained until his death in December of 1768. His *Demonstración* records his observations made during a visita to Sonora and Sinaloa in the years 1759-1763, and contains the earliest detailed description of parts of the present states of Texas, New Mexico, and Arizona, as well as the Mexican states of Chihuahua, Durango, Sonora, and Sinaloa. Two other versions of this manuscript exist, one in the Archivo General de Indias in Seville, and the other in the Biblioteca Nacional in Mexico City. A third version was used by Vito Alessio Robles for his Spanish edition of the *Demonstración* published by Porrúa in Mexico City in 1938, but is no longer to be found. Our copy conforms to that in the Biblioteca Nacional in foliation, size, and other details.

The second manuscript, by Jesuit Father Linck, priest of the frontier mission of San Francisco de Borja, contains a record of his visit to Baja California in search of mission sites and to explore the Colorado River from February 20 to April 18, 1766. He provides an extensive description of Velicatá, later (1768) the site of the first Franciscan mission in the Californias. There are 2 other extant versions of this manuscript, one in the Biblioteca Nacional in Madrid, and another in the Bancroft Library. Our manuscript conforms in size and length to the Bancroft copy, but there are several textual differences, and the deterioration of the Bancroft version makes some words impossible to read. Burrus used the Bancroft version for his 1966 English translation. Our manuscript was signed by Linck, as is the Bancroft; the Madrid is not signed. The Linck manuscript has never been published in Spanish.

Together these manuscripts offer a valuable description of the Southwest and Baja California, providing important information not available elsewhere. A scholarly critical bilingual edition of these sources would be a significant contribution to Southwestern studies. Beristain de Souza, III, pp. 169-70. Bancroft Library,

The World Encompassed 181n: "While Spain and Portugal busied themselves with the wealth of the Indies and quarreled over their rights and privileges in the New World, Dutch ships beat their way back and forth between Lisbon and the northern ports of Europe and the British Isles, trans-shipping the wealth of the East. Charts and sailing directions (coast pilots) were vital tools of their trade, and it was logical that the Dutch should produce this first systematic collection of navigational charts." "Wagenaer was one of the most distinguished cartographers of the 16th century, and one of the first Dutchmen to write on the subject of navigation... The maps were accompanied with brief sailing directions... According to Nordenskiöld this work opened up a new period in the history of marine literature. It is curious to note that owing to the great popularity and importance of the work, subsequent portolan atlases were called Wagoners after the author's name. Fahey, Early Printing in California 56 (3 locations, including this copy): "The circumstances under which the press traveled back to Monterey are obscure. Perhaps Vallejo grew tired of printing; perhaps, improbably, he simply ran out of things to print; perhaps other matters occupied all his time. It is quite possible that Governor Alvarado, in common with his predecessors, had a tendency to issue proclamations and manifestos at the drop of a sombrero, and demanded that the press resume operation at the capital, where it belonged. In any event, returned to Monterey it was, to print the proclamations that the Governor issued in 1840. The above broadside proclamation was the only dated one for 1840 and one of the most important of the Monterey printing period." Greenwood 57. Harding 55. The circular reports official recognition by the Mexican Republic of the appointments of Vallejo as General Commandant and of Alvarado as Governor, posts held "illegally" since the successful revolt of 1836. The confirmation of Alvarado, a native-born Californiano, as governor, implied recognition by Mexican authorities that "un hijo de la alta California" was probably the best choice to administer the remote and often turbulent northern territory, as long as he remained at least nominally loyal and was not a military and/or financial burden to the Mexican government. \$3,750.00
