1. ABBOTT, Rev. Dr. Edward. Original manuscript journal recording visits to Florida, Cuba, Mexico, Texas, New Orleans, etc. V.p., January–March, 1903. 110 pp., with author's original sketches, and numerous other materials tipped or laid in. 4to, original marbled boards (leather backstrip absent). Internally very fine.

The author was a clergyman and editor of *Literary World* 1878–88, 1895–1903 (DAB). He served as rector of St. James Episcopal Church in North Cambridge, Massachusetts. This highly interesting journal was written during his official visit to the Protestant Episcopal missions established in Cuba since the Spanish War, and contains a great deal of ephemeral material, including a large folding lithographic map of Havana (42 x 55 cm.), folded brightly colored lithographed bullfight poster, folding Mexican railway map, numerous other maps, newspaper clippings, bills, steamship tickets, train tickets, prescriptions, calling cards, telegrams, hotel flyers, church service schedules, original photograph of Episcopal Church in Mexico, &c., &c. 3. [ADDAMS, Jane, et al.]. Hull-House Maps and Papers, a Presentation of Nationalities and Wages in a Congested District of Chicago, together with Comments and Essays on Problems Growing out of the Social Conditions. By Residents of Hull-House, a Social Settlement... New York & Boston [1895]. viii, 230 pp., folding charts and schedules, plates, large brightly colored map in front pocket showing ethnic distribution in the Hull-House neighborhood. 8vo, original navy blue cloth. Hinges cracked and some wear, overall a very good copy.

First edition of a pioneering work of sociology. In 1889 Addams (1860-1935), settlement founder and social reformer, bought Hull House in the roughest and poorest neighborhood in Chicago. There, for over 40 years, she waged an incessant campaign in behalf of the poor, ethnic minorities, women, children, and world peace, for which she won the Nobel Peace Prize in 1931. This very scarce work includes Addams' "The Settlement as a Factor in the Labor Movement," Florence Kelley's "The Sweating-System" and "Wage-Earning Children," Charles Zeublin's "The Chicago Ghetto," Ellen Gates Starr's "Art and Labor," and other articles by the Hull-House workers. \$250.00

4. [AGUAYO, Marqués de San Miguel de]. Señor... [Printed petition to the King of Spain]. N.p., ca. 1718. 3 pp., folio folder. A few faint stains, overall very fine.

Unrecorded. Aguayo asks the King to approve land title on his estates in northern Mexico. In presenting his case, Aguayo reveals information that adds to our knowledge of his own life and events related to the Spanish settlement of Texas. He notes that his arrival in New Spain was in 1711, not 1710 or 1712 as previously believed. Aguayo asserts that he furnished cattle from his own hacienda in Coahuila for the missions of South Texas in 1717 when "there were none in that land." \$1,750.00

5. ALESSIO ROBLES, Vito. Coahuila y Texas en la época colonial [with]: Coahuila y Texas desde la consumación de la independencia hasta el Tratado de Paz de Guadalupe Hidalgo. 6. [ALTAMIRANO, Pedro I.]. Informe histórico, canónico, y real, por las misiones de la compañía de Jesus de la Nueva-España: en el expediente con el Ilmo. D. Pedro Sánchez de Tagle... [Madrid? ca. 1751-57]. 22 leaves, title within ornate border. Small folio, protective wrappers. Lower corner creased, but overall a very fine, crisp copy.

First edition of an exceedingly rare work relating to the controversy over who should have control of the missions of Arizona, New Mexico, Sonora, and Sinaloa. The secular faction won the dispute, for in 1759, when Tamarón became Bishop of Durango, he was able to conduct his important expedition of inspection to El Paso, New Mexico, Arizona and Northern Mexico without resistance (see our Catalogue 5, item 312). Eberstadt 120:1: "The only copy now known of Altamirano's 'Informe' on the Jesuit Missions." Howes A190 (dd). Medina, BHA 1047 (taken from Uriarte, Catálogo de Obras Anónimas). Streeter Sale 143: "In support of his contention that Bishop Sánchez de Tagle of Durango had no right to inspect the Jesuit missions in Sinaloa, Sonora, and elsewhere in the North, Altamirano has considerable to say on the founding of the missions and their activities. The question of who should control the mission villages, the secular or monastic clergy, was a fundamental issue of the period. A case in point was the question of an inspection of the Custodia de San Francisco de Nuevo México as noted on leaf 7. The printing date was probably between 1751, a date which appears on the recto of leaf 15 in a reference to the missions in what is now Arizona, and 1757 when Sánchez ceased to be Bishop of Durango." Wagner, Spanish Southwest 122: "Altamirano was the representative of the Jesuits at the Court in Madrid." For further background information see Bancroft, N. Mexico & Texas I, Ch. XX. See illustration. \$20,000.00

The use of officially printed sealed paper was legally required by the Mexican government during the colonial era. Provincial officials sometimes had to resort to using manuscript substitutes like the present example whenever the supply of printed papers from Mexico was depleted. \$150.00

Without the integral blank leaf, as usual, otherwise fine.

First printing. Baird 42. One of the few California letter sheets with a theme about women's history. The commandments stress "feminine" values, oriented to situations women might encounter in California. "Thou shalt not consider it fashionable, cleanly, or economical, to sweep the streets with one-hundred-dollar dresses--when at home thou considered thyself fortunate to get calico; nor to promenade muddy sidewalks in long satin robes and bedraggled underclothes." "Thou shall not...overestimate thine...value because the scarcity of thy sex leads men to bow, almost in worship to silk or calico." Missionary Collado, born in the late 1600's, entered the Dominican Order at Salamanca about 1600, and in 1610 went to Japan, where the Christians were being persecuted. In this letter to the King he describes the martyrdom of some of the Dominicans, Franciscans and Augustinians in 1622, when, disguised as a civilian, he was able to escape the heathen, who did not recognize him, although he was sentenced to die as his companions had. In this petition he stresses the need for more cooperation among the various orders because of the hatred of the Japanese and asks to be allowed to return to Japan with 40 more Dominican friars. "After the martyrdom...in 1622, Collado repaired to Rome, and later to Spain, in the interest of the Oriental Missions. 65. [COLLADO, Fray Diego]. Señor. Fray Diego Collado de la Orden de Predicadores... [Madrid, ca. 1631]. 10 leaves. Folio, protective wrappers. Fine.

First printing. Palau 57569. A long report giving a full statement of the case against the Jesuits in Japan. "They contradict all the other missionaries there, and have published many things which have no bearing upon the truth. They have endeavoured, without justification, to discredit others, falsely imputing to them many misdeeds of which the Jesuits themselves are guilty." He then proceeds to trace the history of the Jesuits in the Far East, from the time of Saint Francis Xavier's arrival in August 1549. He deals at length with the Jesuit attempts to blame him for the persecutions which resulted in 118 martyrdoms in 1662. Collado exposes the Jesuit practice of trading in the East, which they first denied and then admitted by stating that they had a brief from Pope Gregory XIII to this effect, but "upon being pressed to show it, in Rome, they were, of course, unable to produce it." He proposes various measures for the adjustment of matters in the East, arguing in favor of greater cooperation among the Orders in the Orient. \$4,500.00

Folio, contemporary limp vellum. Occasional staining, especially to lower corner of first 40 leaves and inner margin of last 40 leaves, else fine. Extremely rare.

Mendel 36 (first work): "This is a report by Ferro Machado of his visitation to the Province of Florida from January to August, 1688, the first such mission by a Spanish official in almost one hundred years, during which he traveled more than 500 leagues. The writer speaks of the urgent necessity of establishing a separate bishopric for Florida because of its distance from Havana and the many hazards and perils of the journey, particularly from pirates infesting the channel between the island and the mainland. Of particular interest are his many references to the Indians of Florida, their ill-treatment under the existing regime, and how their existence would be bettered and their adherence to the Christian faith strengthened by a local religious establishment."

Mendel 3 (second work): "A detailed and vehement attack on Bishop Juan Ferro Machado's recommendations for improvement in Spanish-Indian relations in the Province of Florida. Ayeta, one of the great figures in Spanish-American colonial history and a prolific and sympathetic apologist for the Franciscan missionaries, wrote in great detail to refute Ferro Machado's charges that the Indians were ill-used." THREE KINO MANUSCRIPTS

We are pleased to offer the following 3 manuscripts of Father Eusebio Francisco Kino (1645-1711), father of the Spanish Southwest, Jesuit missionary, pioneer, statesman, trail-blazing explorer, cartographer, astronomer, rancher, cattleman, agriculturist, architect, expert linguist, teacher, and a strong, intelligent, and compassionate human being. In 1684 Kino led the first overland expedition across Baja California. He proved that California was not an island, and his revised maps of the Pacific coast of North America showed that California was accessible overland. While serving in Pimería Alta, he made about 40 expeditions into what is now Arizona and was probably the first white man to see Casa Grande ruins. An indefatigable, horseman, he often rode 35 miles a day bringing Christianity into areas where it had never been before. He missionized approximately 30,000 Indians from many tribes and performed some 4,000 baptisms. The following 3 manuscripts add to our knowledge of the beginnings of permanent settlement in California and the Southwest and remind us of the strength of the human spirit when directed toward good. These 3 manuscripts will be offered as a lot for a period of 60 days. Full translations and details available upon request. See illustrations.

120. KINO, Eusebio Francisco. Manuscript in Spanish written in a secretarial hand, entitled: "Relacion Brevissim[a] de la entrada grande de la costa, hasta la

contra costa de las Californias o Carolinas, que se hizo desde 14 de Diciembre, de 1684 años hasta 13 de Enero de 1685. Escrita por el Pe. Eusevio Franco. Kino de la Compañía de Jesus, que fue a dicha entrada." N.p., 1685. 10 pp., 8vo. Very fine.

A previously unknown manuscript by Father Kino giving an account of the first expeditionary force to cross the peninsula of Lower California from the Sea of Cortez to the Pacific. Until the discovery of this manuscript, the only known account of this epochal expedition was the 'Informe' of Capt. Isidro Atondo y Antillon (see Vol. 3, pp. 606-627 of Colección Chimalistac 38). Atondo's account, written from the contrasting perspective of a soldier, differs in several respects from the present manuscript. Kino's account, written from the point of view of a missionary, is much more optimistic and detailed than Atondo's, but the two manuscripts are complementary. See Bolton, Rim (pp. 182-190) for a paraphrase of Atondo's account.

Kino left his home base at San Bruno on December 14, 1684, and rendezvoused with the expeditionary party-- Admiral Isidro Atondo y Antillón (Governor of Sinaloa and Admiral of California and its Armada), 30 armed soldiers, 3 servants, the surgeon (Castro), 6 Mayo Indians and more than 20 Edue and Didio Indians, 22 mules packed with provisions, munitions, and tents, and more than 50 horses, 5 of them armored in medieval style. With the assistance and diplomacy of Chief Leopoldo, they passed through Indian villages distributing gifts. Friendly Indians helped them open trails and find water and pastures.

On the 18th they began the difficult traverse of the Sierra Giganta mountains--the trail was so bad that they were forced to use crowbars to proceed. The day before Christmas they approached the most difficult 2 leagues of their journey, for the trail ran into a canyon close to a river bed (Bolton notes that in some places the gorge of this stream is a thousand feet deep). Kino says, "We stopped because the way was so rugged and rocky that the animals could not make headway." On Christmas, after celebrating 3 masses, they were able to open a trail and cross the river on rafts with the help of the 3 Indians they met along the way ("all with such skill that the overseer who accompanied the force said he could not have asked more of the best and most Hispanicized Christian Indians"). On the 27th Kino went by horseback to the top of a nearby peak which they named Sombrerete de San Juan to view the country, and he states "from its rocky heights we

Dorothy Sloan Books – Bulletin 6 (2/89)

could see that the sea of the outer coast was about 15 leagues distant.

On the 29th Kino and a party of 18 soldiers and 3 Indians left the main party and reached the shores of the Pacific on the 30th ("They were the first Europeans to cross California anywhere in all its vast stretch of a thousand and then another half a thousand miles. For this feat alone, if for no others, the names of Kino and Atondo would go together down the ages. Each man felt like Balboa"--Bolton, *Rim*, p. 188). It was here that Kino found "many shells of more colorful orient than mother-of-pearl, for the colors are very similar to those of the rainbow." (Burrus, *Kino and the Cartography*, p. 6: "Along this Pacific shore Kino was to notice the blue shells which a decade and a half later would help him establish the peninsularity of Lower California.") Along this shore Kino met some fearful Indians, and as always, he won their confidence, speaking to them in their own language telling them that he and his party "meant no harm, and that there was no way we came to make war."

On the first of January, 1685, Kino turned his steps back to San Bruno, "first going to the port, which he had named Año Nuevo to better explore it." Retracing their steps back to their home camp, Kino gives a very detailed description of the lands traversed, its flora and fauna, and the natives they met along the way. On the 13th of January they arrived at San Bruno, "where we were received with much rejoicing, and the repeated firing of harquebuses and the two small cannon. And at the admiral's house there was a handsome feast, of which a great many of the natives who during these days congregated partook. They are here still and have daily said their prayers and given us ever increasing hope of their eternal salvation, may His Divine Majesty in His eternal glory grant it."

121. KINO, Francisco Eusebio. Manuscript in Spanish entitled: "Relacion de la segunda entrada de las Californias, o Carolinas, deste ano de 1685, hazia al Sur." Not in Kino's hand, but clearly Kino's own narration. N.p., February 16-March 8, 1685. 3 pp., 8vo, closely written. Very fine condition.

In this manuscript Kino gives an account of the second exploring expedition into the interior of Lower California which took place between February and March of 1685. The party, which included Admiral Isidro Atondo (Governor of Sinaloa and admiral of California and its Armada), Father Goñi, 20 soldiers, 4 Christian Mayo Indians, and many friendly natives, set out from San Bruno for Santa María Magdalena on the Pacific to see if better lands could be

found for crops and colonization. Unable to cross the steep mountains of the Sierra Giganta, they proceeded south for 20 leagues and met many friendly Indians who gave them fish and guided them on their way. Included are interesting anthropological details on the Indians, with descriptions of their chief foods (cactus, fish, and oysters), their dwellings (better built than any the missionaries had yet seen), languages spoken, etc.

They found a large salt mine, from which they took a good supply of salt back to their home base, and discovered a rich pearl fishery. Kino relates that "on one occasion there were some clouds in the sky that appeared to indicate rain, which these natives, who maintain themselves on seafood, must not like, for they asked our men to make the clouds break up or go away, taking them as on the previous expeditions for beings from heaven or gods." Kino names the 14 native settlements discovered, noting that some villages had 200 or 300 inhabitants; he gives a description of the general lay of the land ("good and lovely ports, some very good water holes, some reed fields, mesquites, arrowwood, palms, very pretty beaches from which to fish, and an abundance of fish," etc., but then states that "the most precious pearl to be found in these mountains is the tameness, docility, peace, and tranquility of the natives." He tells how even though one of the soldiers shot one of the natives, they did not retaliate and exhibited "the greatest civility, love, and peacefulness that one might expect from the best of Christians and friends."

The present manuscript is very similar to a manuscript at the Huntington Library, also unsigned and in a secretarial hand (see Bolton Rim, p. 601). However, the present manuscript has at least 20 variants from the Huntington copy and, in our opinion, is more complete, and also better edited. The Huntington version was published in Colección Chimalistac (vol. 18).

122. [KINO, Eusebio Francisco]. Manuscript in Spanish in a secretarial hand, entitled: "Breve relacion de la entrada que desde 13 de Marzo de 1687 se hizo a la nacion y Gentilidad delos Indios Gentiles Pimas y buenos principios de su reducion a nuestra Santa Fe Catholica. [Text begins] Scripta por el Padre Eusebio Franscico Kino de la Compania de JHS que de sus superiores fue enviado por Missionero a d[ic]ha conversion," signed twice by Kino and with his 10-line holographic postscript at end. Dolores, January 25, 1688. 14 pp., 8vo. Very fine.

A very important Kino manuscript, apparently unknown and unpublished. This letter is Kino's first full report on his foundation work in Pimería Alta from his arrival at

Dorothy Sloan Books – Bulletin 6 (2/89)

Dolores in March, 1687 until January, 1688. "Kino's great work began in 1687, when he founded the frontier mission of Dolores, his home or headquarters for the rest of his life" (Bancroft, Arizona & New Mexico, pp. 352-371). In 1687 Pimería Alta (now encompassing northern Sonora and southern Arizona) was the extreme outpost of missionary work and Spanish occupation--a vast, unsubdued, and little-known Indian country on the far northern frontier.

Kino opens with a recital of the royal decree of May 14, 1686, by which he was authorized to bring the Holy Catholic faith to the Indians. He describes his arrival at Cucurpe, where he was "received with many arches and crosses and beautiful music." He sent word to the Pima Indians that he wanted to visit them and received a message that one of their chiefs was ill and wished to be baptized before he died. So, on March 13, 1687, Kino set out with Father Visitor Manuel González and Father Joseph de Aguilar to the village of the ailing chief, whom they catechized and baptized. They proceeded to the head village, which Kino named Nuestra Señora de los Dolores, where the natives "had prepared for us an arbor where we could decently celebrate mass...and they said they were very eager to be baptized and become Christians."

Kino immediately began the practice of sending presents and greetings to natives in remote parts of the territory with invitations to become Christians. From the first, the Indians were friendly and responsive. Kino gives an in-depth account of villages visited, conversions, baptisms, construction projects, establishment of cattle ranches, agriculture, descriptions of the countryside, explorations, and all the myriad activities of those busy and eventful 10 months. He tells how distant tribes sent messengers to him asking for baptism, including "the Guaima Indian Nation;" "the Seris, who live amidst Santa María del Populo and the Tepoquis;" "some who came all the way from the sea."

Kino relates some of the problems he encountered--how at the very time when "the Pimas' chief and many other of his people had joyfully come to Holy Week services," Father González received "a very sad letter" from San Juan falsely alleging that the Indians had fled, but that he was able to dismiss these false reports. Kino tells how the Indians of Nuestra Señora de los Remedios turned against him because of false rumors: "They forcefully stated they no longer intended to become Christians, for their chief had sent word from Bacanuche and Cocóspora for them to have nothing to do with the priests of the Company for the priests often

Dorothy Sloan Books – Bulletin 6 (2/89)

beat the Indians, overworked them, turned them over to the authorities for arrest, and that the priests brought so much livestock where they went that all the water holes dried up." Kino immediately "determined on proceeding to Bacanuche and having the lieutenant governor, Captain Francisco Pacheco, force the governor and chief of the Cocóspara Indians . . . to stop planting such discord and falsehoods, and tell him that if he did not wish to be a Christian not to impede others."

Kino's wonderful account presents a panorama of large and small events, and much detail on the physical arrangements of their dwellings and chapels, including the interesting information that the chapel at Dolores contained paintings by the renowned Master Juan Correa. He concludes with positive words about the land and the Indians: "All these lands are very suitable for all kinds of crops, and no less fertile are the many souls of people who are gentle, docile, affable, industrious, and very adept and devoted to agriculture and anything good that might be taught them, particularly that which touches upon their eternal salvation; [for they are] without idolatry or drunkenness. He mentions his mapmaking: "Soon, with Heaven's favor, I will also send the map, or geographic description or sketch, of the new settlements that are founded, their valleys and rivers, and their locations." Lastly, he expresses his accomplishments and goals: "Up to the present, during these 10 months there have been more than 200 baptisms performed in this new mission. This number, with Divine Grace, will continue to grow greatly, particularly if in this infinite goodness, our Sovereign Lord is served to name workers to spread the Divine Celestial Mercy."

130. [MAP]. ALZATE Y RAMÍREZ, J. A. de. Plano de la Nueva España... Mexico, 1770. Copper-engraved map measuring 34.5 x 44 cm. A few expert repairs to folds, else very fine.

First printing of one of the most important maps of the Gulf Coast printed in the 18th century and the second printed map to bear the name "Texas." The first printed map with that distinction was by the same cartographer and predates the present map by only 2 years. See Martin & Martin 20 and Wheat 149 for information on Alzate's 1768 map. Because Alzate's 1768 map is exceedingly rare, the present 1770 map is probably the first obtainable map to include the designation "Texas." This 1770 map extends the Gulf Coast to the vicinity of Pensacola, while the earlier map shows the Coast only as far east as the Sabine River. Wheat (I, p. 134) discusses the sources for Humboldt's important 1811 map of New Spain and specifically cites Alzate as one of his major sources, indicating the importance of this cartographer's work (see also Tooley, p. 13). This great map is the most important printed Spanish depiction of the U.S. Gulf Coast of the 18th century and the first printed map showing major parts of the Spanish Southwest to be produced in Mexico. This map appeared in Lorenzana's *Historia de Nueva-España* (Mexico, 1770), the most beautiful book printed in Mexico in the 18th century

Mexico, 1769. Copper-engraved map measuring 26.5 x 31 cm. Very fine.

First printing of this map of California and the Pacific Coast made by one of the pilots on the Alcarón expedition sent out by Cortez in 1540. Although long considered to be the first map to bear the name California, Wagner maintained that the name California was simply inserted on the engraving in 1769 (NWC, pp. 31-32). Burrus, however, disagreed, citing Humboldt's assertion that the original manuscript map, which he examined, had the name California written on it (Kino and the Cartography of Northwestern New Spain, p. 30). To further confuse the issue, Leighly (California as an Island, p. 13) cites a Portuguese map of the 1540's as the first to bear the name California. Wheat (TMW 3 & p. 19) avoided the issue but noted Castillo's use of Alarcon's discoveries on this map as well as a castle labeled "la ciudad de Cibora" approximately where Niza's Cibola and Seven Cities were alleged to stand. After all is said and done, we dare not venture an opinion, except to state that this is a beautiful and historic map for California, the Spanish Southwest, Mexico, and early mapping of America. The early printed plan of St. Augustine shows soundings, Indian church, monastery, wooden bridge over swamp, watch tower, castle, stone quarry, etc. The main map shows Florida and the Gulf of Mexico to the tip of South America and the Caribbean to the Antilles. Engraved map on 3 sheets, with original outline coloring by hand. Each map measures approximately 46 x 111 cm. Exceptionally fine. Very rare.

These 3 oversize sheets (together measuring approximately 4-1/2 x 3-2\3 feet) constitute a rare separate issue of an important English map relating to the Pacific Northwest--the Sayer and Bennett issue of Bradock Mead's 1753 map issued under the pseudonym John Green--the map is more commonly found in 6 half sheets from the Jeffreys atlas. Howes M458: "Notable for exposing the cartographical errors made by Buache and Delisle in accepting Fonte's fictions." Lada-Mocarski 10n. Majors 67n. Phillips 1165. Wagner, CNW 649 & p. 160. 141. [MAP]. [ORTELIUS, A.] & G. Chaves. La Florida... Pervviae auriferæ regionis typvs. Guastecan reg. [London, 1606]. 3 engraved maps on one sheet (35 x 46 cm.) measuring respectively 15 x 22.5; 35 x 22.5; and 17.5 x 22.5 cm. Fine copy with large margins.

This map is from the first English edition of Ortelius' great atlas. The map of "La Florida," based on DeSoto's manuscript, is the earliest printed map of the Gulf Coast from Florida to Texas, and is usually considered the first map attempting to delineate any part of the interior of the present U.S. It influenced all maps of the region for a century and is "a primary source document of the first magnitude in the history of discovery and cartography" (Rucker Agee, Birmingham Pub. Lib. Cat. 1970). The present copy is identical to the original of 1584, except that the interesting notes about the regions the map illustrate are in English. Cline, "The Ortelius Map of New Spain" (Imago Mundi XVI), pp. 98-115. Cumming, Southeast 5, plate 9n. HARRISSE, p. 710. Koeman Ort 37(9) (with many interesting notes on this edition of Ortelius): "The English 'Ortelius' was printed in a small edition...No surviving copies are known on the English Continent. Loose-leaf sheets are very scarce." Lowery 70n. Martin & Martin, pp. 18 & 75n: "Privy to all of the official reports of the Spanish explorers, Chaves' map recorded the discoveries of Cabeza de Vaca, de Soto, and Moscoso...One of the earliest printed maps of the territory based on actual observations." This map is from the first English edition of Ortelius' great atlas and is identical to the first issue (Amsterdam, 1580) except the explanatory notes on verso are in English. Koeman Ort 37(7). Wagner, NWC 1579n: "The first printed real map of New Spain." Detailed depiction of the Pacific Coast of Mexico between approximate latitudes 23°DG to 17°DG north, showing Spanish strongholds and Indian towns; Mexico City and Guadalajara are among the hundreds of towns and villages located. One of the most decorative maps of the period. See preceding item for notes on the London edition of Ortelius. \$500.00

This map is from the first English edition of Ortelius' great atlas (Amsterdam, 1580, which was the first atlas to contain a printed map of the West Indies). The map appears in this English issue exactly as the 1580 edition, except that the notes on the verso are in English. The regions depicted are South Florida, the Bahamas, and the West Indies as far as Martinique. The Culiacanae map, which shows a portion of the Pacific coast of Mexico--then a frontier region of northern New Spain--is one of the earliest published maps to accurately depict the geography of Mexico. 145. [MARIANAS ISLANDS]. SOLÓRZANO, P. Original manuscript signed, in Spanish, entitled "Relación de los sucessos mas notables de las Islas de las Marianas desde junio de 1681 hasta junio de 1682," probably in a secretarial hand, but signed and dated by Solórzano at the end. [Marianas, 1682]. 8 pp., folio, closely written. Creased where formerly folded, else very fine.

Father Solórzano, born in Spain in 1649, was a missionary to the Marianas until he was martyred in 1684. In this annual report (June, 1681-June, 1682), he describes the arrival of 5 new missionaries and Antonio de Sarabia, Governor and Captain General of Marianas, which were a separate province independent of the Philippines and New Spain. He also gives an account of exploration and discovery in the Marianas that year. These Pacific islands, now under control of the U.S. and the U.N., were discovered by Magellan in 1521, occupied by the Spanish in 1668, and Japan in 1914. In the Royal Academy of Spain there is a later (18th century) copy of the next annual relation (1682-3). \$11,000.00

146. MÁRQUEZ, Benito. Original manuscript in Spanish (translated from Portuguese), entitled "Sucesso raro de ciertos naufragantes," possibly written by Benito Marquez, whose name appears at the end). N.p. (probably written in the Philippines), ca. 1689. 12 leaves (last page blank), 8vo, written on rice paper. Minor marginal chipping, but overall very fine, given its age and the fragile paper on which it was written.

The manuscript records the extremely interesting adventures of a group of people from various countries, including Portugal, China, Siam, the Philippines, etc., who were shipwrecked in 1682 after sailing to Siam (possibly from Canton?). They lived on some very small islands in a Robinson Crusoe fashion, eating turtles, small game, etc., making their clothing from the feathers of birds, etc. (much of anthropological interest here). They finally made their way to "Hainun" (Hanoi?). On June 25, 1689, Father Fernando de Vega and the Jesuits took in the castaways. They arrived at Canton on August 15 and then went on to Macao on August 28th. The manuscript contains the names of the survivors and those who died. Details available.

First edition, a very limited printing for family members (no more than 50 copies printed). Flake 5307 (locating 4 copies): "Diary: April 7-September 16, 1859. Various references to Mormons; impressed by them." Graff 2711: "The party left Iowa City April 7th, 1859, for Pike's Peak, but became discouraged by the reports heard along the way and changed the destination to California. At Salt Lake City, which they reached July 28th, they decided to sell their cattle and buy passage the balance of the way. They left Salt Lake City on August 10th with Read to whom Mathews paid \$50.00 for transport to Sacramento. They stopped at Carson for a few days and went from there to Virginia City where Mathews made money building and clerking. By June, 1860, he could have sold out for \$45,000, but Indian troubles brought about a collapse of values and he became disgusted and left for Esmerelda in October." Howes M415. 154. [MEXICAN LAWS]. ARRILLAGA, Basilio de (compiler). Recopilación de leyes, decretos, bandos, reglamentos, circulares y providencias de los supremos poderes y otras autoridades de la república mexicana [titles vary]. Mexico, 1829-39. 15 vols., each volume complete, 8vo, full original matching Mexican tree sheep, spines gilt with red and black morocco labels. Remarkably fine, original condition.

A long run of the compiled laws of Mexico from the first session as a newly independent country through 1837. Besides its obvious intrinsic worth to the study of the early history of independent Mexico, this set is of the highest importance for the study of the Southwest U.S., as it contains the decrees and laws of Texas, New Mexico, and California before they became part of the U. S. Among the outstanding laws included are the Reglamento para el gobierno de la provincia de Californias first published in Mexico in 1784 (see Cowan, p. 526, Wagner, Spanish Southwest 166, and Zamorano 80 62); secularization of the California missions; the colonization law of Coahuila y Tejas that opened Texas to Anglo settlement; and hundreds of decrees that relate to Texas and the Southwest which are not found elsewhere. This compilation was one of Streeter's primary sources for the preparation of his bibliography on Texas. Occasionally individual volumes come on the market, but they are usually rebound or in poor condition. It would take years to build a set like the present one, which is probably the finest in existence. \$7,500.00

gobierno, 1823. [2, title] 83 [3] pp. 16mo, original plain wrappers. Very fine.

First edition. The first plan for the first constitution of Mexico as an independent nation, written shortly after the fall of Iturbide. The constitution, which was to be federal, included New Mexico and the Californias. At the end is an interesting essay by José Servando Teresa de Mier regarding the controversy over the political division of Coahuila, Nuevo León, Tamaulipas, and Texas, specifically mentioning the district of Espíritu Santo (the Texas Gulf Coast district). It was felt that there was not enough population in Texas at that time to justify a separate delegate to the national congress. See Streeter 700 and Bancroft, Northern Mexico and Texas II, p. 83. This plan resulted in the 1824 federal constitution, which was the constitution the Texans claimed to be fighting for in the Texas Revolution. \$1,250.00 156. M'ILVAINE, William. 158. MORELOS, José Maria. Original document signed. Huajuapán, Oaxaca, July 27, 1812. One page, folio. Very fine, large bold signature with rubric at end.

This document was signed by the illustrious Mexican patriot Morelos immediately following his great triumph on July 23, 1812, at the conclusion of the Battle of Huajuapán, one of the fiercest battles of the Mexican Revolution, involving a siege of 111 days. Styling himself as "Capitan General de los Ejercitios Americanos," Morelos extols the bravery, constancy, and devotion to the cause of independence that his men displayed in the battle and cites special honors for them. Morelos created a special regiment composed of the men who had fought in the Battle of Huajuapán which he named the San Lorenzo Regiment, after St. Lawrence who was put on a hot gridiron and slowly broiled. Following the execution of Hidalgo the previous year, Morelos took up the cause of independence, and between 1812 and 1815 he controlled the country southwest of Mexico City. In 1813, Morelos convened a national congress at Chilpancingo that subsequently declared independence from Spain. The following year he was captured by the Spanish, defrocked as priest, and shot. Morelos' autograph is one of the most difficult to obtain. See illustration. \$5,000.00

sewn, maize wrappers. Occasional expert repairs, but overall very good.

This work is an objective depiction of rice cultivation and silk production in southern China, stemming from Song period models. The Emperor Kangxi apparently saw a surviving copy, possibly of the 14th century, during his tour in the south and it prompted him to request a Court artist to renew the theme. The painter, Jiao Bingzhen with his pupil Leng Mei, created a fresh treatment of the subject, for which Kangxi wrote the poems against each illustration. Chinese artistic procedures were blended successfully with Western linear perspective. The first printing of this work appeared in 1696. The immense popularity of the set is demonstrated by the present copy, which was probably recut in the 19th century, but retains the close observation of detail of the original. Río made up for his lack of antiquarian training with his zeal, hiring 79 Maya Indians to assault tree-engulfed Palenque with crowbars and axes. 206. [SPANISH FLEET]. Collection of about 40 original manuscripts and contemporary copies relating to Don Cristobal de Eraso (sometimes spelled Heraso). Spain, America, and on the high seas, 1570's & 1580's. Approximately 400 pp., folio. Very fine.

A very important archive relating to the Spanish Fleet and one of its captains, Eraso (see Fernández Duro, Armada Española, Vol. 2). Eraso was for many years in the Spanish fleet, first serving for commerce and later for defense against pirates and preventing attacks against the Fleet of the Indies and coastal towns, such as Veracruz, Havana,

Dorothy Sloan Books – Bulletin 6 (2/89)

Panama, Cartagena de Indies, San Augustine, Florida, etc. Eraso served under Pedro de Menéndez de Aviles (first governor and Captain General of Florida and Cuba); after Menéndez died. Eraso his position as Captain General. Eraso was appointed Captain General of the Spanish Fleet in 1576. This archive adds greatly to our knowledge of the Fleet of the Indies and Eraso, who is only scantily documented by Fernández Duro and a few scattered manuscripts in the archives of Spain.

The first document relates to merchandise, including wine and oil destined for sale in New Spain, to be shipped to Veracruz and then carried overland to Mexico City. The next group of 12 documents relates to litigation arising out of Eraso's service in the Fleet alleging that he misappropriated royal funds, including a cedula of Felipe II notifying Eraso of the amount of the fine levied against him. Included in this group of documents is Eraso's signed defense. The remainder of documents in this group reveal that Eraso was finally ordered to pay only a portion of the claim because he was able to prove that he had spent the money in service of the royal crown against Oxenham, the English pirate in Panama who was a companion of Drake.

The next documents, all from the 1570's, contain full details on Eraso's operations, with an account of the funds Eraso expended in his operations against Oxenham, translation of a letter written to Eraso by Juan de Ledesma about the Spanish Fleet, etc. Next are highly interesting papers dated 1576 regarding charges made by Eraso as Lieutenant General of the Spanish Fleet against some residents of Jamaica relating to a controversy that arose because lodging was denied to 2 soldiers of the Spanish Fleet. They claim that they were not required to accommodate the soldier because Jamaica was not a Spanish Royal possession, but rather under the jurisdiction of the descendants of Christopher Columbus.

The next manuscript is a lengthy legal case of the Eraso family with authorities in Seville arising out of a claim that the family was exempt from certain taxes on wine. This manuscript contains important information on the history of the wine trade in Seville as well as previously unrecorded details on the Eraso family. The final documents, one of which Eraso wrote in 1577, contain an account of the state of the Spanish Fleet made to Felipe II, and how to defend the Caribbean coast against pirate attacks. Many of the documents in the archive are legal copies with signatures of notaries, but because the originals are no longer extant, they are extremely

valuable. Some of the original documents, for example, were kept in the archives of the town of Nombre de Dios, Panama, and were destroyed or dispersed at a later date owing to the tumultuous history of the region. Full inventory available. \$125,000.00

213. [TEXAS]. Manuscript relating to land matters, mostly on sealed paper of Coahuila y Texas, last leaf with Republic of Texas notarial seal, signed by Thomas J. Rusk, John T. Mason, and other early residents of Nacogdoches and financiers of the Texas Revolution. Saltillo, Nacogdoches & Houston, 1834, 1835 & 1838. 18 pp., folio, written in various hands, mostly in Spanish, but last page in English. Folio, ribbon ties. The manuscript apparently relates to the controversial activities John T. Mason, who came to Texas in 1831 as a

secret agent of the Galveston Bay & Texas Land Company. In order to promote his own land speculations, he was successful in helping to secure repeal of the section of the law of April 6, 1830, forbidding further Anglo-American colonization in Texas. With his partners (many of whom are signers or mentioned in this document), he accumulated title to nearly 2,000,000 acres of Texas land. His land schemes were so outrageous that the Texas Constitution of 1836 specifically cancelled his titles citing Mason by name. "With the cancellation of the large grants by the revolutionary government of Texas, Mason's land business was almost wiped out" (Handbook of Texas II, p. 154). The manuscript is signed by many of the early Anglo settlers of Nacogdoches and prime movers in the Texas Revolution, including Thomas Rusk (Handbook II, p. 516-7), Andrew Briscoe (Handbook I, p. 217), Archibald Hotchkiss (Handbook I, p. 841), Vital Flores (Handbook I, p. 612), Adolphus Sterne (Handbook II, p. 670), William G. Logan (Handbook II, p. 73), Louis Rueg (Handbook II, p. 513), Eligio Albarado, J. J. de Cardenas, Antonio M. Pérez, Arthur Henue, Juan Mora, Jn. Egn. Michamps, et al. Other persons mentioned in the document are George A. Nixon (Handbook III, p. 654), Robert A. Irion (Handbook I, p. 892), Antonio Menchaca (Handbook III, 586-7), James Hewetson (Handbook I, p. 804), Rafael Navarro, Juan Lazarin, Vicente Cordova, Miguel Cortinas, and others. The final page of this document, dated at Houston in 1838 and signed by Andrew Briscoe, attests to substitution of powers of attorney of several of the principals involved. \$2,000.00
