This is a translation of the official reports prepared by the Mexican Commission sent to investigate the chaotic state of the border. This work constitutes the most valuable source on the border during the period following the Mexican-American War, containing official findings of the Commission along with articles such as "Historical Sketch of Indian Wars on the Frontier Before 1848, with a Notice of the Immoral Trade Inaugurated with Indians by American Officers;" "Indian Depredations in Texas;" "Robbery of Cattle and Horses;" "A Brief Sketch of the Indian Tribes which have Lived in Mexico" (including Seminoles, Kickapoos, and Muskogees); "An Account of the Lipans;" "Invasion of Mexican Territory by Forces or Citizens of the U.S.," "The Indian Policy of the U.S." etc. The large folding map (measures 32-1/4 x 28 inches) is one of the most detailed maps of the period (Day, Maps of Texas, p. 87); it shows the Rio Grande from its mouth to the Big Bend region and locates ranches on both sides of the border. \$1,250.00

An excellent collection, unpublished, and coming directly from the Garrett family through Jarvis Garrett, the youngest of the children of Pat F. and Apolinaria Garrett. Jarvis Garrett is the sole surviving member of the Garrett family and the family possesses no more documents. This offering will be the last of its kind from the Garrett family, and it includes the exclusive right to publish the letters. The letters may be characterized as warm letters of a husband to his wife, with particular concern for their children's well-being. What makes them valuable, however, are the new insight they provide into Garrett's life and time, particularly for their illumination of Garrett's continuing financial problems and his aspirations. The letters give fresh insight into New Mexico politics, business, and commercial history. "Lawman Garrett (1850-1908) killed Billy the Kid, and that single act dominated his life and what history remembers of him" (Lamar, pp. 432-3). Garrett began as a cowboy and buffalo hunter in Texas, moved to New Mexico, and eventually became sheriff of Lincoln County. In later years he was a horse rancher, customs agent, and entrepreneur in various unsuccessful Western business ventures. Details and inventory upon request.

129. GUNTER, A. C. Mr. Potter of Texas. A Novel. London: Routledge & French, 1891. [2] 278 [8, ads] pp., endpaper ads. 8vo, original glazed pictorial boards. Upper hinge reinforced, fragile spine and boards shelf worn and chipped, but overall very good, considering the fragile nature of the binding.

Early British edition, with endpaper and rear ads "Routledge's Railway Library Advertiser." The first edition was published in New York and London in 1888. An unusual book with 2 features seldom, if ever, found in a 19th century Texas novel. First, the book is a yellow-back, in the original binding characteristic of cheap fiction sold in railway bookstalls in the latter half of

Dorothy Sloan Books – Bulletin 7 (8/89)

the 19th century. Because of the very nature of yellow-backs, they seldom survive. Second, the novel contains an opium sequence. Dr. James D. Hart in *The Popular Book* (pp. 188-9) gives a biographical sketch of the English author, who came to the U.S. at an early age and took up novel writing after retiring as a stockbroker in California. 158. KENDALL, George Wilkins & family. Large archive containing original letters and manuscripts, printed material, photographs, paintings, and artifacts. Inventory available upon request.

Kendall (1809-1867) was one of the most important and influential men of his day. In 1837, Kendall founded the New Orleans Picayune, and for 30 years guided the paper and built it into a powerful force for Texas and westward

Dorothy Sloan Books – Bulletin 7 (8/89)

expansion. Almost from the beginning of the Picayune Kendall was concerned about the fate of Texas, joining the clamor for annexation in 1837. Kendall became a lifetime champion of Texas after making trips to Houston, Galveston, and Austin in 1838-39 to arrange for expanded circulation of his newspaper into Texas. In 1841 he joined the Texan Santa Fe Expedition as a reporter. The party was captured in New Mexico, and Kendall spent 2 years in prison in Mexico. His Narrative of the Texan Santa Fe Expedition (1844), the best account of the expedition and one of the best campaign narratives ever written, was a 19th century best-seller. During the Mexican-American War Kendall catapulted to great fame as the first modern war correspondent with his dramatic front-line stories written while riding with the Texas Rangers and General Worth. His magnificent illustrated portfolio on the War has been called "the very best American battle scenes in existence" (Bennett).

Although Kendall received a Texas land grant in 1841, he did not move to Texas until after the War. He settled for a time near New Braunfels and after several moves finally purchased a ranch in present Kendall County (named after him), where he undertook sheep raising with the same intensity he had devoted to journalism. Kendall is known as "the father of the sheep business in Texas" (Handbook of Texas). Included in the collection there is even a daguerreotype of the first pedigreed sheep brought to Texas!

The collection also documents the myriad activities of the Kendall women, especially George's wife, Adeline de Valcourt, and their daughter, Georgina, neither of whom have been studied by scholars of women's history. In 1849 Kendall met and married Adeline (1830-1924) in her native France where their 4 children were born. Adeline was beautiful, cultivated, and strong. After George died and left her in debt, she took over management of their ranches and showed great executive ability. The elegant, intelligent Georgina (1850-1947) became the family historian, and it is only through her efforts that the Kendall Archive was preserved. She is still fondly remembered in San Antonio, where she was active in all aspects of its cultural life.

Some idea of the Kendall Archive may be obtained by consulting the bibliography of Fayette Copeland's biography Kendall of the Picayune (Norman, 1943, pp. 321-3). Although a few items listed by Copeland have strayed from the collection, there are also significant items in the archive which are not mentioned by Copeland. A full

Dorothy Sloan Books – Bulletin 7 (8/89)

inventory is available, so we will mention only a few of the high spots.

Personal possessions of George Kendall include: his ivory handled boot pistols made in London preserved in original box; his gold watch and chain engraved with the buffalo hunting scene used as the frontispiece of his book on the Santa Fe Expedition; his signet ring received for participation in the Mexican-American War; his bronze medal for serving as aide-de-camp to General Worth; his drinking horn fitted with silver and semi-precious stones and with his initials engraved on a silver heraldic shield.

Manuscript material includes Kendall's original Texas land grant signed by Anson Jones and much other material on land matters; voluminous notes for Kendall's projected history of the Mexican-American War (to date unpublished); correspondence from Robert E. Lee, General Worth, DeCordova, Persifor Smith, J. Antonio Navarro, Greeley, King, Holbrook, Lumsden, his publishers, etc., along with Kendall's numerous letters to Adeline (1850's) and other family members. Present are contemporary English translations of what appear to be captured Mexican dispatches from the War between Rejón, Santa Anna, and others. Adeline's letters to George are included, as well as many of her ranch journals. Also represented is a massive amount of Georgina's correspondence (including her retained copies), historical notes, family letters, etc. The photography collection is particularly rich, including daguerreotypes, tintypes, cartes-de-visite, and other photographs of Kendall, his family, and their ranches. Also present are 2 large oil paintings of Kendall in later life, one of which hung in the Picayune offices for many years, a miniature on bone of Kendall as a young man, and the 1862 painting of Post Oak Springs Ranch illustrated in Copeland's book. Details upon request.

The far northeast corner of the map shows a faint hint of Fremont's 1843 delineation." Shirley 48: "Much sought after as it somehow reflects the ambiguities of his age. A framework of medieval thinking is having to be re-cast in order to accept the as yet unrealised extent of the newly conquered lands. Fries drew upon Waldseemüller's map of 1513, but added the name "America" and banners containing the names of the winds around the map. 1710]. Engraved map with original outline coloring, place names in German. 20 x 23 inches (inset of Kino map 7-3/4 x 7-1/2 inches). Very fine, an excellent impression, large uncut margins. No centerfold or evidence of having been part of a bound atlas, but with the number 22 at upper right.

The map is large and handsome, but the feature that arrests our attention is the curious inset map with title "P. Eusebius Franz Kino aus der G. J. entdeckte zwischen dem 1698 und 1701 J. das Californien eine Halbinsel sey." This map incorporates elements of Kino's 1701 map (Wheat 83 & 89) and the curious Nueva Navara map of 1710 (Wheat 91). Features of the Nueva Navara map include the large island at the mouth of the Colorado River, the interior mountains of the Sierra Madre, use of the designation "Neu Navarra," etc. Elements retained from the 1701 Kino map are the layout of the islands in the Gulf of California, courses of the rivers, names of the Indian tribes, etc. Burrus (Kino and the Cartography of Northwestern New Spain) discusses the evolution and various printings of Kino's landmark maps, but he does not mention the present one. From the atlas accompanying Lapérouse's Voyage (London, 1799; the original edition came out in Paris 2 years before--see our Catalogue 5, item 180 for a description of the complete work). A landmark San Francisco map, and virtually the only obtainable printed chart of the Bay done in the 18th century. Martin 2: “[Münster] presented a remarkably advanced outline of the American continents, especially considering that less than 50 years had elapsed since the first voyage of Columbus... Münster’s map of the New World was probably the single most widely distributed map of America of the age. Previously unrecorded issue of an important early printed world map. Bagrow-Skelton, p. 100. HARRISSE 82n: “A very important map.” Shirley 23A (describing this copy): “An unusual variant map, believed to have come from a 1504 (Schott) edition of Reisch’s *Margarita*... Taliaferro wrote: ‘There is no doubt in my mind that it is pulled from a completely new block rather than one that had been masked or altered.’ It seems possible that this unrecorded variant may predate the normal four-headed version.” The World Encompassed 49 (citing the 1503 version): “This curious map is an interesting combination of fact and fancy, of the Ptolemaic world with medieval facets. On it is an inscription which some writers have interpreted as a reference to the discovery of America... It is generally accorded that the scales of measurements, as we understand them, came in, for both latitude and longitude, with [this] map.” Winsor, II, pp. 95, 114. \$7,500.00

First edition. Taliaferro, Cartographic Sources in the Rosenberg Library 349: "Roessler's maps are the only printed maps that preserve the results of the Shumard survey, the state's first geological and agricultural survey." This large, handsome production contains illustrations of the Old State Capitol Building and the General Land Office. At the lower left is a colored inset map measuring 11-1/4 x 11-1/2 inches entitled "Map Showing Agricultural and Varieties of Soils in the State of Texas." This map is one of the few maps that shows disputed Greer County as a part of Texas; in 1896 the Supreme Court ruled Greer County to be under U.S. jurisdiction (see Handbook of Texas I, p. 730-32). Roessler was one of those controversial self-promoters who seem to flourish in Texas. Born in Hungary and trained as a geologist, he worked on the Texas Geological Survey in the 60's and was associated with the Texas Land and Immigration Co. of New York in the 70's. He was accused of thievery and plagiarism, but his maps are the best contemporary records of agricultural and mineral wealth. \$5,000.00

197. [MAP]. ROSS, E. H. Ross' New Connected County & Rail Road Map of Texas and Indian Territory. St. Louis: E. H. Ross Western Map Emporium, 1872. Engraved pocket map with original coloring in green, maize, pink, and lilac, handsome engraved oval vignette of a train pulling into a station. 39-7/8 x 26-3/4 inches, folded into original 24mo dark brown blind-stamped and gilt-lettered cloth folder, ads on front endpaper. 1 inch = approx. 16 miles. A few small tears at folds (no losses), else very fine, a choice copy with contemporary table of distances for the Kansas Pacific R.R. laid in.

First edition, second issue (the map also issued in 1871, identical except for date). Phillips p. 846 (citing only the 1871 edition). Taliaferro, Cartographic Resources in the Rosenberg Library 343 (photostat only). In the history of Texas cartography certain landmark large-scale pocket maps come to mind, such as Austin's map of 1830, Hunt & Randel's map of 1839, and DeCordova's map of 1849. The present map stands in this same tradition, as do the maps of Roessler (see item 196, above) and Eppinger & Baker (see item 178, above). Ross used Austin's map as the starting point for his format and created one of the earliest, perhaps the first, Texas map designated as a railroad map. The map also shows early development of railroads in Indian Territory. Exceedingly rare--the Library of Congress has the 1871 issue, of which we trace no other copies; we trace no copies of this second issue.

200. [MAP]. [TEXAS]. Large collection containing about 400 maps relating to Texas. V.p., v.d., mostly 1870's to 1900, a few of earlier or later vintage. Complete inventory available.

This incredible collection contains almost 200 of the lithographed Texas county maps issued by the General Land Office in the late 1870's and 1880's, over 100 manuscript maps, over 100 original blue print maps, and various other materials relating to land ventures and development in 19th century Texas, such as railroad maps, ranch surveys, and municipal maps tracing the urbanization of Austin. Included are 2 large and very rare 19th century lithographs of proposed additions to Austin and Corpus Christi. This archive was the map collection of the Maddox Land Company in Austin and includes some papers related to the Company (O. Henry was employed by the firm at one time, and included with the collection is a typescript of Frank Maddox's recollections of O. Henry). Many of the maps were displayed at the 1936 Texas Centennial Exhibit at Dallas (related correspondence is with the collection). This collection is an important source of information for researchers attempting to recreate the time when land played a major role in the development of Texas as well as for anyone seeking a better understanding of settlement in the Lone Star State. \$50,000.00

First edition. Wheat, Mapping the Transmississippi West II:378 & pp. 94-5: "No mapmaker had previously attempted to use such a large scale for any Western area." California is shown from its northern border near Pt. St. George to slightly south of Monterey at Big Sur. At the left is a profile showing the mountain ranges from Acapulco to Mexico, apparently based on Humboldt, whose notes on California appear in a box at the upper right. This is one of the most aesthetically pleasing 19th century maps of California. \$500.00

Father Martínez (born Abiquiu 1793, died Taos 1867) acquired New Mexico's first printing press in Santa Fe from Ramón Abreu, who, according to Josiah Gregg's diaries, had it carried overland from the U.S. in 1834. The first New Mexico imprint, a broadside list of qualified jurors, was printed in 1834 (see #228 herein). Martínez arranged to have the printing press and its first printer, Jesús María Baca, transported from Santa Fe to Taos in the summer of 1835. The Instituciones is the Bill of Rights for Castile and the Indies. Although not the earliest New Mexico printing, this book is the longest and most ambitious imprint made in New Mexico up to that time. Bound in with this work is 32 pp. headed Leyes y axiomas with rules for translating Latin into Spanish, also printed at Taos on the Martínez press as part of Martínez program of publishing educational books (Martínez was schoolmaster at Taos). printed by Ramón Abreu, is a list of citizens eligible for jury duty. It is often hyped as being rare, but in reality there always seems to be at least one copy on the market, even though one is invariably told that it may be the last chance to obtain a copy. Actually this situation is probably fortuitous, allowing many collectors and institutions to own one of the first New Mexico imprints without paying a princely sum. \$1,750.00

Rada, and of the Marqués de Villa-Puente, one of the founders of the Pious Fund. Gertrudis' many pious acts included donation of funds for the founding and furnishing of several missions in California. The title *La mujer fuerte* is apt, for Gertrudis was indeed a strong woman whose continued support of Jesuit missions was in defiance of her children's wishes, who brought suit against her estate and the Jesuit order. Barrett (1933) states that authorship of biographies of Ugarte (1753) and Salvatierra (1754) has been attributed to Oviedo. This work sometimes appears with Carranza's *Llanto de las piedras*. This rare Republic of Texas scrip signed by one of Galveston's earliest settlers appears to be the earliest engraving made in Texas. Medlar, Texas Obsolete Notes and Scrip, p. 152. Signer Clopper was "one of the first to see the potential of Buffalo Bayou as a trade route between the Brazos area and the sea. [He] organized the Texas Trading Association in 1827...In 1826 he purchased the peninsula between Galveston and San Jacinto bays, now known as Morgan's Point" (Handbook of Texas III:177-8). Stremme, a native of Germany who immigrated to Texas in 1849, was an architect and scientist who accompanied the Michler expedition. Miller-Brown is considered to be the leading contemporary artist for the depiction of native Texas plants. Her paintings are scientifically accurate while still capturing the beauty of the living plant. The artist does detailed, extensive field work, creating her art work mostly from live specimens. The line quality is crisp, her design sense is excellent, and the paintings with their vibrant colors are a joy to view. Miller-Brown's paintings were used to illustrate Nokes' How to Grow Native Plants of Texas and the Southwest (Austin, 1986) and the National Wildflower Research Center calendar for 1987. 300. TYLER, John. Message from the President...Proceedings of the Commissioner Appointed to Run the Boundary Line between the U.S. and the Republic of Texas. Washington: SD199, 1842. 74 [5] pp., 6 folding maps. 8vo, recent brown cloth. Very fine.

First edition. Phillips, America, p. 843. Streeter 1432. Streeter (1438n) calls the maps in this report "the most important in Texas history, in that they show the final boundary between Texas and the U.S. from the Gulf of Mexico to the Red River" and states that the book is one of the most important for a Texas collection. In the

Dorothy Sloan Books – Bulletin 7 (8/89)

introduction to Vol. 3 of his Texas bibliography, Streeter further comments that the maps "are of prime importance. Prior to this publication...the actual boundary was so poorly known that Miller County, claimed by Arkansas, turned out to be a part of the Republic of Texas." The text contains correspondence and negotiations between the Republic of Texas and the U.S. commissioners. The map of the Sabine Pass is on an extremely large scale (2 miles = 1 inch). Also included is a 3-foot long map of the Sabine River. \$850.00

301. [UNION LEAGUE OF AMERICA]. Manuscript minute book of the Galveston Council No. 1 of the Union League of America. Galveston, January 1869–July 1870. About 75 pp. Small folio ledger book. Contemporary three-quarter red leather over marbled boards. Fine, with several related items laid in, including 2 printed circulars of the U.L.A.: Austin, April 20, 1870, signed by G. W. Ruby; and Austin, May 27, 1870, signed by James P. Newcomb (both imprints unrecorded by Winkler).

A highly important item for black history in Texas, related to the Union League of America, a powerful force for politically educating black Texans during Reconstruction. The secret organization worked to educate blacks to vote the radical Republican ticket (Handbook of Texas II:88), and there is some implication that the Ku Klux Klan was organized as a response to the U.L.A. The minutes document G. T. Ruby (Handbook of Texas II:513) as Grand President of the U.L.A. of Texas, and much of the journal concerns his involvement with the Galveston Council during the radical convention held in Galveston in the summer of 1869 and the promotion of his successful candidacy for senator to the 12th Legislature of Texas. See Barr, *Black Texans* (pp. 44-46). \$750.00

Pickrell, Pioneer Women in Texas, pp. 469-474. Handbook of Texas II:832. \$100.00

304. VEGA, Manuel de la. Original manuscript letter signed in full and with rubric, to the Discretorio of the College of San Fernando, Mexico, dated at Mexico, October 20, 1783. One folio page. Very fine, preserved in a half maroon morocco slipcase.

This letter concerns a controversy over succession to the guardianship of the College of San Fernando, the training center for the Franciscan missionaries to California. Vega (Commissary General of the Indies) writes that because the Visitador General was present at the time of the death of Father Pangua (the former guardian), the Visitador's selection of the new guardian applies rather than that made by the local Vicario de Casa. Vega says that the method of selection outlined in the papal Bull applies only when no authority is present. For details on the power plays among factions of the Church and State over the California missions see Bancroft, California I, pp. 319-327, 378-382, etc. \$750.00

307. [VENEZUELA]. Unattributed manuscript in Spanish entitled Reflexiones. [Caracas, Venezuela, ca. 1810]. 15 pp., folio. Very fine, from Sir Thomas Phillipps' library.

These 20 "reflexiones" concern preparations for defense of the city during the Revolution. The artisans and farmers are to flee to remote places when they hear news of the armies approaching, taking with them food and supplies. Local authorities promise safe passage, as well as tax exemptions and cash for their products. All firearms are to be delivered to authorities. Indians and Negro slaves are to be trained in the use of arms. An inventory of horses is ordered before owners hide them. Arrangements are made for safekeeping of sacred objects in churches. And other interesting provisions, along with the observation that since men of the city are not expert soldiers, they may be embarrassed in battle. \$500.00
