6 [ATLAS]. LAS CASES, A. E. D. J., Comte de. Atlas Historico, Genealogico, Cronologico, Geografico... Traducido... por un Espanol Americano. Paris: Bossange, 1826. [4] 4 pp., 35 double-plates, mostly letterpress with colored highlights and attractively colored maps. Very tall folio, modern half Mexican tree calf, red and green leather labels, spine with raised bands. A very fine, fresh copy.

First edition in Spanish, apparently the second issue. Palau 1132360. Not in Sabin, but see 39124-5. This popular atlas, originally published in French in 1802., was translated into several languages and went through many editions. The author is best remembered for following Napoleon into exile at St. Helena and recording his memoirs. The atlas contains a most attractive map of America, along with colored American flags, and historical sketches of each country. The Mexican section has brief notice of the Mina expedition that launched from Texas. Similar in format to the Carey & Lea atlas.

J. Martinez, 32 x 28-1/2 inches (see Day, Maps of Texas, p. 87). 8vo, original beige printed wrappers, original dark brown cloth backstrip. Occasional foxing to text and a few tears in folds of the large map neatly repaired, overall a fine copy of the most important borderlands item of the period.

First American edition of the Mexican report published in Spanish the same year. Adams, Herd 558 & 2264: "Rare. The northern frontier question and cattle and horse stealing." Graff 2765. Howes I32. In response to recurring Indian depredations and increase of cattle rustling on the Texas-Mexican border, a Mexican commission was formed to investigate charges by the U.S. that the crimes were committed by Mexicans and Indians. This report, which the Mexican government ordered printed in English translation, absolves Mexicans of wrongdoing and accuses the U.S. of connivance. The little-known large map of the Rio Grande from its mouth to the Big Bend region is one of the most important and detailed of the period, showing each state along the border, towns, rivers, mountains, roads, forts, lakes, and every Mexican and American ranch. A respected Southwestern scholar who examined this copy at length commented that for its period it was comparable in importance to the Pichardo treatise for the colonial period of Texas history.

47. CLEMENCEAU, Georges. "Le Conflit Mexicain." Original manuscript, unsigned, 5 pp., 4to, written in last two weeks of April 1914. A few old creases and some light staining on first leaf, generally very good.

The French senator discusses the American invasion of Veracruz in a highly political and accusatory tone. He refers to the incident that arose when the U.S. warship Dolphin, which was not flying its flag, landed some men at Tampico who were arrested by Mexican authorities. Even though the U.S. soldiers were released and a formal Mexican apology was made, Wilson refused to drop the incident unless the Mexicans made a 21-gun salute in honor of the American flag. Clemenceau takes great delight in evoking the Monroe Doctrine and Wilson's pacification plans, commenting: "This is the same Wilson who, over a

disagreement that the least justice of the peace would have mediated in a brief session, plunges into bloody adventures that take him who knows where. When the monsters of pacifism behave in such a manner, what can others do? If the American army crosses the Rio Grande in order to invade Mexico, it will find itself in rebel territory.. It would not surprise me that the American Latins were unanimous in condemning the brutal aggression of the great Anglo-Saxon brother against a Latin Republic." Very fine, original condition.

In this letter written soon after Cortés' return to Spain from his historic conquest of Mexico, he informs the King and Queen that he will wait in Madrid for 15 days in order to have an audience with them. He goes on to state that members of the Council of the Indies and the King's Attorney have attempted to indict and penalize some of the men who were with him in Mexico for failure to register gold which they brought with them from New Spain. He assures the King that this is all a mistake and begs that his men not be sued "for they are among the people who have contributed much to the conquest and pacification." He closes with the customary high-flown language honoring the King and Queen and praying for "ever-extending kingdoms and titles for a very long period." His hope for a grand title, such as Viceroy of Mexico, would soon be dashed. An outstanding letter, with excellent content.

121 [MAP]. AGUAYO, Marquis de, attrib.]. "Mapa de el Paxafe don esta Cituado el Presidio y Misiones de Sn Antio Donde Empieza la Provid. de Texas..." [San Antonio, Texas, 1722]. Manuscript map in black ink on white colonial linen, 17 x 13 inches. Light age-staining. Fine, original condition, in handsome museum quality mat and frame. Earliest known town plan map of any place in Texas; first known map of San Antonio area; one of the earliest town maps of the Southwest.

This original map, which has never been in any archival collection and bears no signatures, stamps, or registry identification, is illustrated in this catalogue (frontispiece) and on page 105 of Santos' Aguayo Expedition in Texas 1721. This is the original map, in all probability drafted by Aguayo himself, and previously it has been known only from the slightly different version in the Archivo General de la Nacion de Mexico (Vol. 236 Ramo Provincias Internas). The copy in Mexico, which is smaller in format and on cotton paper with tape stains and a tear across the bend of the San Antonio River, is illustrated in Bolton's Texas in the Middle Eighteenth Century and Repts' Cities of the American West (Fig. 3.5). It appears that this map was among the several maps of Texas that Brigadier Pedro de Rivera reportedly lost before submitting his report and Aguayo's presidial plates to the Archivo de Indias. This outstanding map was drawn in 1722 in conjunction with Aguayo's expedition to Texas in 1721-22 (see Handbook of Texas I:117). This expedition was the cementing factor in assuring Spanish possession of Texas, and more than anyone else, the Marquis established Spanish rule through his shrewd and logical disposition of the troops, establishment of presidios and missions, and recommendation of the establishment of civil government in Texas. His town plan, as illustrated in this historic map showing the proposed municipality of San Antonio de Casafuerte and environs to be settled by Canary Islanders, would fulfill all of Aguayo's expectations in developing into the City of San Antonio.

This handsome map by one of the most important Spanish geographers of the 18th century is the second printed map to apply the name "Texas" to a geographical region. The first printed map with that distinction was by the same cartographer and pre-dates the present map by only one year. For an illustration of Alzate y Ramirez's 1768 map, see Martin and Martin, Maps of Texas 20 and Wheat 149. Because the 1768 map is of the greatest rarity, the present map is probably the first obtainable map to use the name "Texas." This 1769 map extends the Gulf Coast to the vicinity of Pensacola, while the earlier map shows the Coast only as far east as the Sabine River. Wheat (Vol. 1, p. 134) discusses the sources of Humboldt's famous 1811 map of New Spain and specifically cites Alzate y Ramirez as one of his major sources, indicating the importance of this cartographer's work. This great map is the most important printed Spanish depiction of the U.S. Gulf Coast of the 18th century, and the first printed map showing major parts of the Spanish Southwest to be produced in Mexico.

131. MARTOS Y NAVARRETE, Angel de (Governor of Texas), Viceroy Marquis de Cruillas, et al. Two printed cédulas with manuscript notations, 5 folio pp., both signed by Viceroy Cruillas, dated October 15 and 31, 1760 at Mexico. With: 4 pp. manuscript written in Texas at various places, signed by Governor Martos y Navarrete (see Handbook of Texas II:152), Domingo Gorasea, and Francisco Antonio Solis at Real Presidio de Nuestra Señora del Pilar de los Adaes, March 2, 1761, with another document immediately following signed by Manuel Ramirez de la Pusina, Phelipe Antonio Pérez, and Pedro de los Reyes at Real Presidio de Nuestra Señora de Loreto and Bahia del Espiritu Santo on April 3, 1761, and continuation of the manuscript signed by Balthasar Péres and Martin Flores at Real Presidio de San Antonio de Bexar, April 6, 1761. Some old stains and repairs, overall very good.

The cédulas concern a trade fair to be held in Jalapa in conjunction with the arrival of the Spanish fleet in Mexico, and the Viceroy orders participating merchants to divide their merchandise into imported items and items for export, such as products of America ("fruto de America"), cacao, linen, etc., and imported items such as books, medicine, printing forms and equipment, and "other instruments." The continuations in manuscript are the statements acknowledging receipt of the Viceroy's orders, signed by the Governor of Texas, and forwarded to the next presidio, where the document is forwarded once more to the next presidio. Very interesting items for documenting trade and commerce in the far reaches of the Spanish Southwest, and highly unusual in that it bears the signatures of not only the Governor, but the presidial captains as well. The Texas signatures were made at present-day Robeline (Louisiana), Goliad, and San Antonio. \$2,500.00

Madrid, August 6, 1650. 2 pp., in green levant morocco case [with]: Letter Signed with the Royal Sign Manual, to Admiral Don Pedro Porter Casanate, in Reply to the Latter's Letter Concerning the Discovery of the Gulf of California. Madrid, August 6, 1650. 2 pp., in green levant morocco case. Both in splendid original condition.

The first letter concerns Casanate and his proposed expedition. The King summarizes his arrangements with Casanate, the dominant figure in the exploration of the Gulf of California from 1635 to 1653, and details his proposed expedition. The Viceroy is instructed to obtain reports, ascertain costs and means of the expedition, and, if the explorer discovers anything of value, like a pearl fishery, to come to his assistance. On the same day, Philip IV in his second letter, writes to Casanate, denying him the judgeship of Sinaloa, but encouraging him in his explorations and demanding a full report once they are concluded. In short, while the Crown and the Council of Indies were unprepared to aid the explorer, they were quite willing to benefit by his excursions. Full translations are available of these two letters--two of the earliest and most important documents pertaining to the Gulf of California and the discovery of Baja. 191 [RUSSIA].. Collection of 126 Russian Posters, containing works produced by Russian artists in the early months of World War I as propaganda for the Imperial Russian war effort. About 10% of the collection consists of multi-colored billboards designed and printed in the mid-1920's, intended to serve the ends of the Soviet "cultural revolution" of the NEP period by indoctrinating the masses with the values of the new regime.

These posters are not merely rare--they illustrate a suppressed episode in the history of Russian poster design. It should be noted that very few art institutions and libraries in the U.S. and Europe preserve any number of Russian posters dating from the 1914-15 period. The present collection is thus an invaluable source for students of Russian history and

213 [TEXAS RAILROADS]. GRAY, A. B. Southern Pacific Railroad. Survey of a Route for the Southern Pacific

Dorothy Sloan Books – Catalogue 1 (12/84)

R.R.... Cincinnati: Wrightson, 1856. 110 pp., 31 (of 33) lithographic plates of scenes along the route by Texas artist Schuchard, including virtually unknown views, such as "Valley and Town of Mesilla, New-Mexico," "Fort Chadbourne, Texas," "Pecos River, Texas," "Guadalupe Mountains near El Paso, Texas," "Fort Yuma, at the junction of the Gila & Colorado Rivers," etc., 2 maps (lacking the "Preliminary Map," like the Huntington copy, which is lacking another map as well). Howes G331: "With a series of unrivalled Southwestern views." Plains & Rockies IV:275. An exceptionally rare book.

Bound with the Gray report and extending into another volume are about 20 reports and separately issued Colton railroad maps, several of which are not recorded elsewhere, including reports of the Memphis, El Paso & Pacific R.R. Company (Clarksville, Texas, 1860, and Paris, Texas, 1866) and very elusive works, such as Buckley's Preliminary Report of the Geological and Agricultural Survey of Texas (Austin, 1866). These copies bear the signatures and notes of J. M. Daniel, Chief Engineer of the Memphis, El Paso & Pacific Railroad Company, dated 1867 (see Handbook of Texas II:170 and Reed, A History of Texas Rail-Roads, pp. 93-94). An incredible association copy, documenting the linking in Texas that created a transcontinental railway system. The work is made more valuable by the presence of Schuchard's lithographs that bring to life Texas, New Mexico, and Arizona as they existed 130 years ago. The Texas plates will be included in the survey of Texas lithographs being prepared by Ron Tyler and Bill Holman.
